

Joint Canada-Sweden Professional Development Workshops - 2009

The Swedish Trade Council, in association with the Canadian Urban Institute, is planning a series of Professional Development Workshops related to waste to energy and sustainable city building. These workshops will consist of an intensive “pre-tour workshop” and “debrief” in Canada and a “study tour” to learn some of these concepts and examples firsthand and meet Swedish experts in these fields.

With content and examples from across Sweden, and opportunities for interactive participation and discussion with energy and sustainability experts, this will truly be a comprehensive international learning experience. We expect participation from across Canada, and all Canadian companies, organizations and municipalities are welcome to attend!

Waste to Energy tour

Planned for May 23 – 30, 2009

- Meet some of Sweden's leading Waste to Energy companies and visit their facilities
- Meet representatives from municipalities and local government to see the impact W2E has had on their cities
- Discuss the Canadian W2E context, and build connections between Canada and Sweden

Sustainable City-building tour “SymbioCity”

Planned for September 19 – 26, 2009

- Visit Sweden's top sustainable communities such as Hammarby Sjöstad in Stockholm, Västra Hamnen in Malmö and Älvstranden in Gothenburg (<http://www.symbiocity.org>)
- Meet with community initiators and companies involved in building sustainable cities
- Apply these concepts to Canadian cities for a “made in Canada” approach to sustainable city-building.

Custom made tour

- Cannot find what you're looking for in any of the tours above? Want to see more Swedish biofuel or wind power? Why not let us help you create your “own” tour?
- Contact us with your ideas and we will put a tour together that suits your needs

For more information, please see reverse.
